Treatment Planning

Successful treatment begins with a clinician's ability to effectively assess a client's situation, symptoms, diagnoses, and treatment needs. Once a clinician has obtained information about their client through assessment, a functional treatment plan is necessary to then engage the client in the treatment process. Treatment plans are not one-size-fits-all and do require individualization and variation based on numerous factors. When implemented in collaboration with our clients, treatment planning improves client engagement, functioning, and treatment adherence. Additionally, treatment plans provide expectations for client and clinician, guide goal-directed treatment, assist with evidence-based approaches, and measure progress and quality of services.

Learning Objectives:

Upon conclusion of this program, participants should be able to...

1. Create achievable, objective, and measurable goals that are individualized for the client
2. Evaluate effectiveness and quality control of a treatment plan

Learning Level:

Basic

Target Audience:

This training is designed for professional counselors, school counselors, social workers, marital and family therapists, psychologists, addiction counselors, case managers, nurses, and other health care professionals.

Continuing Education:

To obtain the certificate of completion for the 1.25 clock hours (1.5 CE hours) associated with this course, the participant will need to attend the webinar presentation. Attendance will be taken at some point prior to the completion of the presentation. At the end of the program, participants will receive a certificate of completion and optional program evaluation.

The content of this event may meet requirements for most national, state, and local licensing boards and professional organizations. Be sure to print the event description and submit with your certificate of attendance to your professional board for consideration. For rules governing continuing education, participants should contact their respective regulatory boards.

Kansas Behavioral Sciences Regulatory Board does not require pre-approval of CE programs and does not even offer an approval process for most professions. They will consider CE programs that cover content specific to each profession's practice, skills, ethics, and knowledge. Additional information is provided on their website under each profession, typically in the FAQ sections.

Missouri Division of Professional Registration does not require continuing education providers or programs to be approved prior to the event. They will accept continuing education that is relevant to each profession (i.e. for professional counselors content must be primarily related to counseling, for psychologists content must be mostly psychological, and so on). Additional information is provided on their website.
